BUS 363 – MANAGERIAL FINANCE

planning and financial forecasting, management of short-term and long-term assets, and the firm's capital structure and cost of capital.

STUDENT LEARNING OUTCOMES:

Upon course completion, students will be able to:

- Discuss the goals of financial management and the environment in which the business firm operates.
- Demonstrate an understanding of the functions of financial markets and institutions, financial statements and the basic structure of interest rates.
- Develop financial planning and forecast financial needs to support the firm's growth
- Demonstrate the application of the basic financial concepts of time value of money and risk/return relationship.
- Determine the value of stocks and bonds issued by corporations.
- Plan and determine the investing decisions of the firm using capital budgeting techniques.
- Demonstrate the ability to calculate cost of capital and determine the optimal capital budget

COURSE REQUIREMENTS:

Course requirements consist of homework assignments and successful completion of three exams including two midterms and a final exam. The exams consist of multiple-choice questions and problems. The first exam will cover chapters 1 through 4. The second exam will include chapters 5 through 8 and the final exam is comprehensive and covers chapters 1 through 12.

All exams are proctored and no notes or books are allowed, but student may use a basic or financial calculator. The followings will be provided with each exam.

Exam #1: Financial ratios from chapter 3

Exam #2: Time value of money tables (Appendix B through Appendix E)

Final Exam: Financial ratios from chapter 3 and time value of money tables (Appendix B through Appendix E)
