### Course Objectives

- Students will be able to describe the Love and Logic process for developing responsible children.
- Students will be able to recognize and apply the Love and Logic Formula for parenting.
- Students will be able to identify the ownership of childhood problems.
- Students will develop techniques for guiding children to own and solve their own problems.
- Students will develop techniques that set firm, reasonable limits for children
- Students will understand the role of compassion and empathy in problem ownership and learning through logical consequences.
