1. In the upper left hand corner you will see a “Caution” symbol on top of the security lock. This signifies that Firefox is blocking the content.

2. Select this symbol. The first option among the list will state “Firefox has blocked parts of this page that are not secure.”
3. Click the right arrow next to this statement.

4. It will expand more options. From here, select the option to “Disable Protection for Now.” This will allow you to view the video.
