Dear Student:

IMPORTANT NOTICE REGARDING YOUR IMMUNIZATION RECORD AND ATTENDANCE TO CLINICAL FOR THE NURSING PROGRAM.

All students accepted into the Nursing program at Adams State University are required to submit current immunizations (including pending immunizations in a series) on the attached immunization certification form, signed by a health care provider or official, or copies of office records/state/national immunization data base.

This requirement is based on federal, state, and local laws and regulations governing immunizations and the health status of college students and student trainees in health care settings. Submission of this form is required for ASU Nursing students.

Your immunization form must be received at the Nursing Department Office before your Junior fall semester begins. Failure to submit these forms on time could affect your participation in clinicals.

The law requires all new matriculated students who were born on or after January 1, 1957, to have two mumps, measles, and rubella doses; the first dose administered no earlier than four days before the first birthday, the second dose at least twenty-eight calendar days after the first date.

Measles, mumps, and rubella vaccine is not required for students born before January 1, 1957.

In lieu of immunization, written evidence of laboratory tests showing immunity to measles, mumps, rubella, and varicella is acceptable.

In event of an outbreak, those students for whom a medical, religious, or personal exemption has been submitted will be withdrawn from classes until the outbreak is contained.

Submit forms to:
