Click on the “Tools” menu.
Click on "Account Settings".
In the left panel, click on "Outgoing Server (SMTP)".
In the right panel, click on the "Edit" button.
The "SMTP Server" window opens.
Change the “Port” field to 25.
Uncheck the "Use name and password" field.
Ensure that "Use secure connection" is set to "No".
Although you can specify more than one outgoing server (SMTP), this is only recommended for advanced users. Setting up multiple SMTP servers can cause errors when sending messages.

- **Description:** <not specified>
- **Server Name:** mail.adams.edu
- **Port:** 25
- **User Name:** <not specified>
- **Secure Connection:** None

Click "OK" to close the Account Settings window.
