General settings
Configure secure mode and settings storage location

Run FileZilla in secure mode?
In secure mode, FileZilla does not remember any passwords.
It is recommended to use secure mode if several people have access to this PC.

- Use secure mode
- Do not use secure mode

FileZilla can store its settings in two different places: In the registry and in an XML file.
In most cases it is recommended to use the XML.
If you are in a multi-user environment where each user has its own profile, you should use the registry as storage location so that each user has its own settings for FileZilla as well.

- Use XML file
- use registry

Change this setting to "Use secure mode".
