How To Use Getit To Obtain Your Username and Password.

Step 1:
Using a computer in one of the student computer labs if you are on campus type in getit for the username and leave the password blank. If you are not on campus you can go to http://www.adams.edu/getit

Step 2:
This website will appear. You will need to enter your SID (Student Identification Number) and your token number you were given; then Click Submit Query.
Step 3:
The information on this screen is your username and password; write it down you will need it. The top two lines display your Novell Network, Dial-In username and Email address. The box contains your password. (Make sure to get all the caps and lower case letters correct).

Web Information:
